

Please rewrite claim 8 as follows:

8. (once amended) A method for producing a pallet for supporting a load of packages comprising multiple layers, said method comprising:

- b2
- a) wrapping at least one of said multiple layers with a flexible film around a first axis;
  - b) wrapping said at least one of said multiple layers with a flexible film around a second axis which is generally perpendicular to said first axis;
  - c) adhering a disposable/recyclable base to said flexible film.

Please rewrite claim 13 as follows:

13. (once amended) A pallet for supporting a load of packages comprising multiple layers, said pallet comprising:

- b3
- a) support means for supporting said load of packages, said support means comprising flexible film wrapped around at least one of said multiple layers around a first axis and a second axis, said first axis being generally perpendicular to said second axis, whereby said flexible film covers at least a majority of said at least one of said multiple layers; and
  - b) disposable/recyclable base means adhered to said support means for receiving forks of a forklift.
